KOTLENIDE

Idiomatic UI tests

Chapter 1. Usage (not yet implemented! sorry...)

gotal is implement some kinde of DSL like this:

```
class AwesomeTests {
    @Test fun 'selenide with idiomatic kotlin should be awesome'() {
        open("http://127.0.0.1:8080") {
            it.find("form") {
                it.find("input[type='text']") {
                    it.sendKeys "hola!"
                }
            }
            it.find("button") {
                it.press enter
            }
        }
    }
}
```

TODO: implement documentation...
